- **Combats digestive problems** such as colic and diarrhea.
- Can be used as A **standalone defense against disease** or an adjunct to traditional methods.

In addition, Equi-Sure is proven to work on the following ailments:

- Ulcer Colic
- Diarrhea
- Dehydration
- Stress
- and more!

How does Equi-Sure work?

The ingredients in Equi-Sure combine to form an antibacterial cleanse that naturally breaks down bacteria in a horse's stomach. Equi-Sure naturally creates a high PH level in the horse, reducing signs of ulcers. In addition, Equi-Sure naturally creates an appetite in horses and will keep them eating and drinking when stressed.

Equi-Sure works best when administered to horses on an empty stomach and is completely all natural and safe to use in all types of horses, including foals and lactating mares. Equi-Sure is used as an adjunct to traditional methods or as a stand alone defense against disease.

INGREDIENTS:

corn oil, guar gum, orange extract, onion extract, soybean oil, glycerine, vegetable-based fatty acids, natural apple flavoring, water, and colloidal silver.

RECOMMENDATIONS

To maintain a healthy horse, administer 10ML 1 to 2 times Weekly.

To maintain a horse with ulcers, administer 10ML once a day until clinical signs cease. To maintain them with 1 to 2 doses per week or as needed.

To entice a horse to eat and drink, administer 10ML as needed.

In cases of colic, response should be seen within 45 minutes of dosage. For Equi-Sure to work effectively, it must be fully ingested by the animal. Acute cases may require treatment for an additional two days, as well as a combination of traditional treatment methods. Individual results may vary.

It is recommended to administer Equi-Sure as an additive when antibiotics are being used. This will increase appetite and reduce stress allowing your horse to heal quickly.
